Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This communication is responsive to Amendment dated 8/3/2005.

Claims 25-30 have been newly add; claims 1-30 are pending for the examination.

Election/Restrictions

Claims 1-30 contain embodiments directed to following patentably distinct species of the claims invention:

A. One embodiments drawn to an in-plane switching mode liquid crystal display comprising a plurality of first electrodes formed in each of the pixels wherein each of the first electrodes contains a plurality of first electrode offshoots; and a plurality of second electrodes formed in each of the pixels wherein each of the second electrodes covers at least one of the first electrode offshoots in each of the pixel, [figs. 5 & 8; claims 1-12 & 25-27].

B. Another embodiment drawn to an in-plane switching mode liquid crystal display comprising a plurality of first electrodes formed in each of the pixels wherein each of the first electrodes contains a plurality of first electrode offshoots; a plurality of capacitor electrodes arranged parallel with the first electrode offshoots in the pixels, each of the pixels comprising at least one of the capacitor electrodes; and a plurality of second electrodes wherein each of the second electrodes covering at least one of the capacitor electrodes formed in each of the pixels, [figs. 7-8; claims 13-24 & 28-30].

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of claims is generic.

Applicant is advised that the reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent from or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
